Libby, MT 59923

**Subject: Transmittal of Report of Findings
Sampled Worker Air Space during Routing Maintenance
Activities
Libby, MT**

Mail to:

Mike:

I have enclosed two (2) copies of the above report to the U.S. EPA Information Center. The report documents the most recent re-assessments (NEA) conducted on MDT maintenance subcontractor, Tetra Tech, Inc. in June 2007. The assessments were conducted in conjunction with routine worker maintenance on Highway 37 right-of-way in the vicinity of the former Libby, MT. All air monitoring samples were analyzed by TENNECO Environmental Laboratory.

Please contact me if at (406) 444-7632 or at [bgoor](mailto:bgoor@mt.gov) for questions or comments.

Sincerely,

Brian S. Goodman
MDT Environmental Services

Mike:

I have enclosed two (2) copies of the above report for the EPA Libby Information Center. The report documents the most recent round of negative exposure assessments (NEA) conducted on MDT maintenance employees by an MDT subcontractor, Tetra Tech, Inc. in June 2007. The sampling activities were conducted in conjunction with routine worker maintenance activities on MT Highway 37 right-of-way in the vicinity of the former W.R. Grace vermiculite mine. All air monitoring samples were analyzed by TEM at the EMSL Westmont, NJ laboratory.

Please contact me if at (406) 444-7632 or at bgoodman@mt.gov if you have any questions or comments.

Sincerely,

Brian S. Goodman
